

The Composting Association

The Composting Association is the leading membership organisation for the composting and biological waste treatment industries in the UK. It promotes the sustainable management of biodegradable resources, actively encourages the use of biological treatment techniques and advances good management practices throughout the industry.

The Composting Association works on behalf of its members to raise awareness of the benefits of the recycling of biodegradable resources. It aims to act as an advocate for the wider composting and biological treatment industries and to represent their views in a constructive dialogue with policy makers. The Association envisages an industry in which best practice is shared, standards are maintained and surpassed and which makes a positive contribution to safeguarding the environment.

The Composting Association aims to:

- Represent its members effectively;
- Spread good practice;
- Provide information in a timely and appropriate manner;
- Offer value for money for its members;
- Pre-empt and respond to the needs of the industry;
- Be accessible to members, policy-makers, the press, regulators and local and national government;
- Give a hands-on approach to its activities;
- Be consistently excellent in everything it does;
- Maintain high levels of customer service.

The Composting Association operates to support its members, helping them to achieve their objectives through the development and promotion of good practice and the creation of a sustainable regulatory framework.
